

SIGN BASES

RubberForm Sign Bases are made in the USA from 100% post-consumer recycled rubber and plastic making it the most durable, attractive, and eco-friendly base on the market.

Our sign base can be deployed anywhere and is the preferred choice for parking lots, grocery stores, restaurants, plazas, construction sites, municipalities and more! It is the ideal solution for anywhere portable or semi-permanent signage is needed.

The RubberForm Sign Base was designed with a low center of gravity to ensure its ability to stay upright in severe weather and light enough to be tipped and rolled to another location. Combined with our recycled aluminum traffic signs, they make an excellent choice for eco-friendly companies.

Key Features

- Aerodynamic design – low center of gravity withstands strong winds
- Enhances safety and minimizes liability
- Supports any sign up to 24"
- Portable and easy to install – just tip and roll
- Made in the USA with 100% American recycled rubber
- Impact and weather resistant – will not warp, chip, crack, spall, or corrode
